Med Tiles

Eclectic Mediterranean Pattern

The Med Tiles design is an impression of the antique Moorish tiles found in the Mediterranean cities of Spain, Portugal and North Africa. Inspired by the vast heritage behind these patterns, the design features a worn and aged look and is printed in a reactive color meaning that every piece is unique. Ideal for sharing plates and signature dishes, Med Tiles mixes and matches with other Churchill ranges to create an eclectic look.

New for Spring 2023 are core plates, feature piece triangles and accessory pieces, printed in the fresh, reactive Aquamarine colorway for an eclectic tabletop look.

BRITISH STANDARD EUROPEAN APPROVED

VITRIFIED HOTELWARE

We test the vitrification of our products everyday, both in the kilns during firing and in our laboratory when the manufacturing process is complete.

BRITISH STANDARD MECHANICAL DISHWASHER RESISTANCE

We test dishwasher durability to British Hospitality Standard BS 12875. In service testing has demonstrated that under hospitality use, this is the equal to 5000 dishwasher cycles.

FULLY GLAZED BASE

Although glazing the feet of our ceramics adds complexity it increases functional benefits to the customer. Foot glazing requires 'pin firing'. This prevents scratching to tables and plates when stacked.

STACKABLE

The technology used to form our products ensures consistency in size and weight allowing pieces to be stacked back of house using less space and reducing breakages.

SUPERIOR GLAZE FINISH

Our glaze is hard wearing and designed specifically for the hospitality environment. Sprayed glaze creates a smoother and more consistent finish.

DURABLE AND VITRIFIED

Breakages in ceramics are generally related to porosity or how much water a piece can absorb. Water absorption weakens the chemical structure affecting its durability over time. Through the process of vitrification, the particle structure of our ceramic body becomes strong, dense and watertight.

ECO GLAZE

Our glazing system is carefully formulated to allow oversprayed glaze to be collected, go through a lengthy cleaning process and then be reused, minimising our impact on the environment.
